

KOLPIN[®] OUTDOORS

Kolpin Synthetic Rope Kit

Product Instructions | Part No: 85064 / 85065 / 85075

Please read and understand these instructions completely before installation to avoid injury to yourself or damage to the vehicle or accessory

INSTALLATION:

1. Unspool and detach metal cable from the winch drum. (If applicable when installing 85075 short plow lift rope: Save the longer synthetic rope for later use when plowing season is over).
2. Route synthetic rope through the fairlead and attach to the winch drum using your winch's normal metal cable attachment method. (*OPTIONAL - If no attachment method is available, tie the rope to the winch drum using a loop knot.*)
3. Spool synthetic rope, keeping rope tensioned uniformly, onto the winch drum using back-and-forth layering. This will help prevent nesting under load.

TIPS FOR BEST PERFORMANCE:

- It is important all rope layers be tightly spooled onto the winch drum with sufficient tension.
- Rope may slacken on the drum during initial use, therefore, it is essential to repeat the spooling process at regular intervals to prevent nesting.
- Replace roller fairleads that have been used with metal cable, as they can cause fraying and/or premature synthetic rope failure.
- Plow lift rope should only be used for plow lift applications only. Replace lift rope for vehicle recovery applications.

NOTICE

When replacing a metal winch cable with synthetic rope, a new roller fairlead or aluminum hawse is required to be installed to prevent rope fraying or damage.

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer's control. In order to protect you and your ATV, certain parts of the plow system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer's warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
